

Partnerships

Looking for a partner to help establish or expand behavioral health and/or acute physical rehabilitation services?

Signet offers a variety of partnership levels. Let us help you enhance the continuum of care and achieve your financial goals.

Signet provides behavioral health and/or acute rehabilitation services to the community as sole owner of the operations while working with local healthcare facilities to manage patient flow and need.

5 WHOLLY OWNED SIGNET FACILITY

Signet and partner jointly establish a freestanding behavioral health or acute rehabilitation hospital. Ownership is determined by each party's contribution of capital, land, and/or existing operations.

4 JOINT VENTURE

Signet leases space within an acute care medical/surgical hospital and establishes a separate license as a behavioral health or acute rehabilitation hospital. This allows guaranteed income and enhanced/expanded services provided on-site.

3 HOSPITAL WITHIN A HOSPITAL (HIH)

Signet provides start up, enhancement or expansion of behavioral health or acute rehabilitation operations through management oversight with clinical and operational best practices.

2 MANAGEMENT SERVICES

Signet provides evaluations, recommendations and profitability impact on services needed in the community based on marketplace, clinical operations and financial analyses.
